IT VoiceMail

interactive telesis:

More than talk: Proven Success.
More than technology: Solid Solutions.

The Power of voicemail - with the features you need.

IT Voicemail provide convenient access to voicemail messages via your phone, web browser, or email. IT Voicemail enables convenient communication on your time instead of real-time, when you want it – how you want it. IT voice mail improves business performance by increasing communication and time efficiency.

With features like Call screening, Call Queuing, Call forwarding, Follow-me, and Option Modules such as Speech Recognition (SR) and Central Voicemail Management (CVM), you will never go back to a traditional voicemail system again.

Total Access - Anytime From Anywhere

With IT Voicemail, you can quickly and easily retrieve, organize, respond, and forward your voice messages. You can stay connected whether you are in the office, working from home, or traveling. With features such as Call screening, Call Forwarding, and Follow-me, you decide if you wan to work in real-time or on your time.

Turnkey or Software Only Solutions

IT Voicemail integrates with Centrex and most PBXs. The IT Voicemail runs on non-proprietary hardware and leverages Intel Telephony products. The true power of our product is in our software. We provide turnkey solutions or simply the software and a recommendation for the hardware. With purchase flexibly, enhanced features, and option modules Interactive Telesis delivers a superior product at an affordable price.
